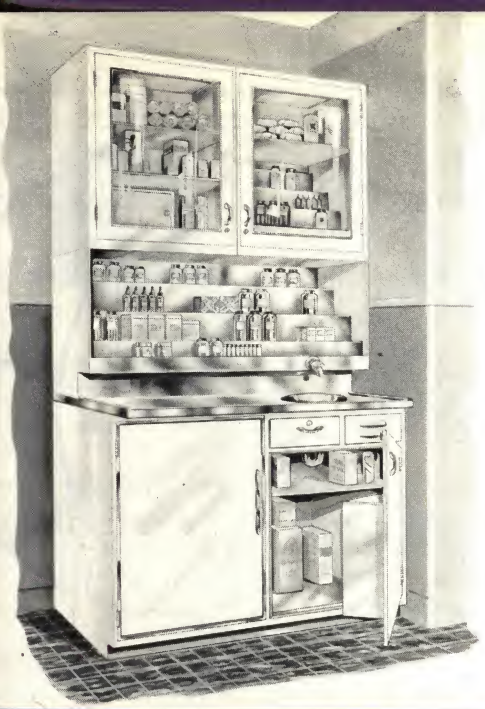
MAY



MEDICATION PREPARATION CENTER—The ultimate in studied storage for nursing areas and utility rooms — expansible and flexible. Provides Visible Tiered Medication Storage, Double-locked Narcotic Locker, Locked Medication Area, Refrigerated Storage, Sink with Full Depth Working Surface. Needle Storage, Spacious Under Counter Bulk Storage.

Every detail is planned for improved work-flow efficiency, time-saving, step-saving convenience that assists your hardworking nursing staff — helps make patient care easier, and working conditions a source of continuing satisfaction.

Casework that reflects careful planning for today's needs and tomorrow's expansion — confirming, years from now, the worth of Maysteel's "Hospital-Designed" advantages.

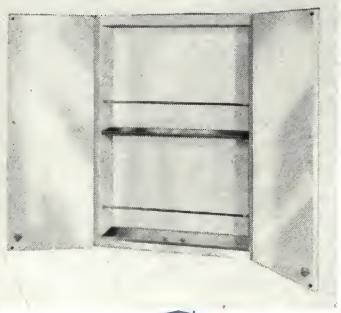
Wall Storage—Sliding doors, counter cabinet, with stainless steel or formica ledge, undercounter base cabinet.

Wall and Base Cabinet — With double locked Narcotic Locker, base cabinets with drawers and or adjustable shelves.

Instrument Storage Cabinets — Visible storage with pull-out shelves and adjustable stainless steel, glass, or baked enamel storage shelves.

All Purpose Storage Cabinets — Combining visual and concealed storage with glass, stainless steel, or baked enamel shelves.

Full Height Storage Cabinets — Provide visual inventory, have silent-action glass doors, five adjustable shelves of stainless steel or baked enamel. Duplicate with solid steel doors for non-visual storage. Sloping top eases cleaning and sanitation.



Bed Pan Storage Cabinet — Unit holds bed pans and urinals. Available in several designs, to accommodate the practices followed in your hospital.

SORTING WORK COUNTER
Versatile island type unit stainless steel sorting bins and working surface, adaptable to many areas. Choice of base units with drawers, open or closed shelves — 48" wide, in varying lengths.

ILLUSTRATING 3 OF THE VERSATILE ARRANGEMENTS OF THE SORTING WORK COUNTER.

Above — Sorting Counter with center drawer storage and working space for four people. **Left** — Sorting counter with 2 4-drawer cabinets at one end and 2 double door cabinets at other end.

WHY Maysteel "Hospital Designed" CASEWORK ?

Casework, a major equipment investment, falls into the category of "the best is none too good." Used 24 hours a day, every day, good casework must be engineered with an understanding of specialized hospital requirements.

For example — superior strength — cabinets designed for loads up to 250 lbs. per square foot, without rack or twist — smooth, quiet-operating drawers and doors, handles and pulls prelocated for easy reach — hollow back provides ventilation around cabinet at wallside, as well as tight bearing to wall — drawers full size for maximum storage — these and many others are basic reasons why Maysteel Casework, "Hospital Designed," provides your best investment for years and years of trouble-free use.

STAINLESS STEEL CASEWORK

Stainless steel casework by Maysteel, interchangeable with similar unit in baked enamel, offers a lifetime installation with gleaming satin finish, ideal for economical, long-range hospital operation. Maintenance requirements are at the absolute minimum.

BAKED ENAMEL CASEWORK

The final protection of "Hospital Designed" Casework involves the all important wearability, plus color — Maysteel 6H finish, "Hospital Designed" and tested, porous free "porcelain like" appearance — extreme surface hardness, highly resistant to impact, high humidity, detergents, and chemical solutions.

It means an easier surface to maintain for todays asepsis and lifelong freshness of appearance. Actually Maysteel 6H Finish, is added insurance for longer life to every installation.

COMBINING STAINLESS STEEL AND BAKED ENAMEL CASEWORK

Working top surface as well as doors, drawers and shelves can be furnished in Stainless Steel, — the rest of the Casework in gay, Baked-on Enamel colors. This highly versatile, attractive and worthwhile combination, pioneered by Maysteel, offers the extra durability of Stainless Steel and the functional color harmonies of Baked-On Enamel.

"HOSPITAL DESIGNED" MAYSTEEL CASEWORK

'REACH-PLANNED' FOR CONVENIENCE

Keeping the work load in mind and designing equipment to minimize it is one of the fundamental requirements of Maysteel "Hospital Designed" Casework. **Reach planning** is one of these work-saving, step-saving, fatigue-saving features. For instance, in the illustration above, you notice that cabinet door pulls and drawer handles can be reached without the effort of squatting, bending, stretching or turning. Counter and working surfaces are built to average-height, minimum fatigue convenience. The highest shelves are brought down to easy reach from floor level with no loss of storage area.
